

SHRAVAN PARTHE

Backend Developer | AI/ML Enthusiast | Mobile App Developer

☎ 7385813010 ✉ shravanparthe@gmail.com 🔗 LinkedIn 🐙 GitHub 📍 Mumbai, India

PROFESSIONAL SUMMARY

Results-driven Computer Science & Engineering student at the University of Mumbai (BTech, 2027) with hands-on expertise in backend development using Java and Spring Boot, and AI/ML integration using Python, NumPy, and pandas. Experienced in building scalable, production-ready web applications with clean architecture and modular design, spanning domains including fintech, healthcare, and edtech. Passionate about bridging backend systems with intelligent AI features to deliver real-world, high-impact software solutions.

WORK EXPERIENCE

Data Science with Gen AI Intern | Internship

Apr 2026 - May 2026

Innovexis

Remote

- **Selected** for Innovexis's competitive Data Science with Generative AI internship program after shortlisting from multiple applicants
 - Working on real-world data science projects integrating **large language models** and generative AI techniques
 - Applying **Python, NumPy, Pandas**, and **Scikit-learn** for data analysis, preprocessing, and model building tasks
 - Gaining hands-on exposure to production-level Gen AI workflows, LLM integration, and applied machine learning
- Technologies / Skills Used :** Python, numpy, pandas, Scikit-learn, fastapi

EDUCATION

Vishwaniketan's Institute of Management Entrepreneurship and Engineering Technology (ViMEET)

Jun 2023 - Present

B.Tech in Computer Science Engineering (AI & ML)

CGPA : 7.5 / 10.0

- Currently pursuing a **B.Tech** in **Computer Science Engineering**, specializing in **AI & ML**

PROJECTS

MedoraX AI — Clinical AI Assistant | 🐙 Github

Oct 2025 - Nov 2025

Developer

- Built a multimodal clinical AI assistant supporting voice, image, and text inputs — transcribing symptoms via **Whisper-large-v3**, analyzing medical images via **Llama-4-scout**, and generating structured diagnostic responses using **Llama-3.3-70b**
 - Implemented multilingual support (**English, Hindi, Marathi**) with Edge TTS/gTTS voice output, enabling accessible healthcare guidance for rural and non-English-speaking users
 - Integrated GPS-based hospital finder using **Google Maps & Places API** and real-time AQI monitoring via Google Air Quality API, with automated emergency detection for critical symptoms
 - Deployed on Hugging Face Spaces with a three-tier caching system (image, TTS, place details) achieving 4–7 second response times
- Technologies / Tools Used :** Python, Gradio, Groq API, Google Maps API, Google Places API

SahayLoan — Micro-Loan Platform | 🐙 Github

Jan 2026 - Mar 2026

Developer

- Built a full-stack micro-lending platform (loans up to ₹1,00,000) with a **Flutter** frontend and a **FastAPI** Python backend serving RESTful APIs
 - Developed an AI credit scoring engine using a **Random Forest classifier (Scikit-learn)** to evaluate borrower creditworthiness and automate loan eligibility decisions
 - Implemented digital KYC with Aadhaar & PAN card extraction using **Tesseract OCR** and integrated **Stripe** for online EMI repayments
 - Designed a multi-role system (Borrower, Admin, Loan Provider) with **Firestore** real-time database, and push notifications
- Technologies / Tools Used :** Flutter, Dart, FastAPI, Python, Scikit-learn, Firebase, Tesseract OCR, Stripe

SikshaSetu - Rural Education Platform | 🐙 Github

Jan 2025 - Apr 2025

Developer

- Developed a full-stack education platform to bridge the digital divide for students in rural and underserved communities.
 - Implemented **role-based access control (RBAC)** using **Spring Security** and **JWT/OAuth 2.0** for secure multi-role authentication.
 - Designed and optimized a relational database schema with **Spring Data JPA** and **MySQL** for efficient academic data management.
 - Created a responsive frontend UI using **React.js** for seamless cross-device access.
 - Integrated ZEGOCLOUD's real-time video SDK to enable virtual classrooms, allowing faculty to schedule, start, and host live online meetings and learning sessions for students.
- Technologies / Tools Used :** React, Spring Security, JWT, Spring Boot, MySQL, Spring Data JPA

AI-Powered E-Commerce Platform | 🐙 Github

Oct 2024 - Jan 2025

Developer

- Engineered an intelligent e-commerce backend featuring AI-driven product recommendations using **Spring AI** and vector similarity search via **Redis Vector DB**
 - Integrated a generative AI chatbot for real-time customer support and product assistance using LLM APIs
 - Built an AI-powered product image generation pipeline, enhancing product visualization for end users
 - Implemented secure user authentication and authorization using **Spring Security** and **JWT**
- Technologies / Tools Used :** React, Spring Boot, Spring AI, Spring Security, Redis Vector DB, Tailwind CSS

SKILLS

Programming Languages :	Java , Python, JavaScript, Dart
Frameworks & Libraries :	React, Spring Boot, Flutter, Spring
Tools & Platforms :	Docker, GitHub, NumPy , Pandas, Scikit-learn
Databases :	MySQL, PostgreSQL, Firebase
Soft Skills :	Communication, Problem Solving, Adaptability
Languages :	Hindi, English
